In a globalized world, digital technologies change markets, and sustainability is becoming a key factor. For Bosch, this means reacting with greater flexibility, speed and transparency to increasingly individualized customer wishes — while meeting the highest quality requirements at the same time. This is a demanding task for the 33,000 employees of Bosch Supply Chain Management. Their work in the subfields of purchasing and logistics relies on automated processes and digitalization. The Gazpromneft oils brand appeared as a result of Gazpromneft-Lubricant's business expansion in 2012. The Gazpromneft oils production for cars and light-weight commercial vehicles was an answer to the high market demand for quality lubricants in this market segment. Over its seven-year history, Gazpromneft has grown up from several products for the most popular car makes and models in its line to a wide range of oils for vehicles both in Russia and abroad. At the present time, Gazpromneft manufactures advanced motor and transmission oils and lubricants for cars and lightweight commercial vehicles.
